Resources

# Technology We Used

## Android Studio & Kotlin

We used the Android Studio platform along with Java and Kotlin to make our application's main features interactive.

## Figma

We used Figma to create the UI/UX model for our app prior to developing the front end. Additionally we created our logo on Figma.

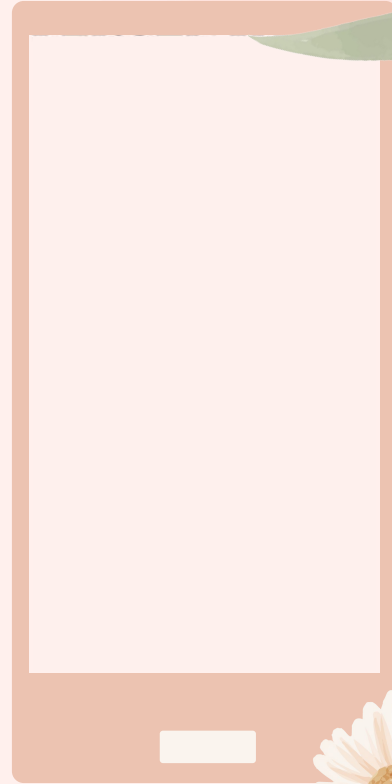

# Video Demo

# Developmental Journey

1. Acclimating to Android Studio
2. Learning Kotlin syntax
3. Project scope

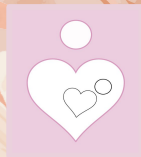

# Next Steps

- Adding chat box feature that allows users to reach out to mental health professionals that cater to their needs
- Incorporate a feature with Google Maps to locate the nearest hospitals in user's area
- Creating a hardware aspect that takes vitals from patients at intervals
- Creating an account feature

Thank You
